

# Tucker Kerr

Providence, RI | (540)490-0269 | [tuckerkerrbusi@gmail.com](mailto:tuckerkerrbusi@gmail.com)

LinkedIn: <https://www.linkedin.com/in/tucker-kerr> | GitHub: <https://github.com/TuckerKerr> | Portfolio: <https://www.tuckerkerr.com>

## EDUCATION

**Johnson & Wales University** | Providence, RI | Expected May 2027 | GPA: 3.9 | Dean's List

**Bachelor of Science in Computer Science** | Upsilon Pi Epsilon Honor Society | Theta Delta Chi Fraternity

## TECHNICAL SKILLS

**Languages:** Python, Java, C, C++, PHP, JavaScript, HTML/CSS, Kotlin, SQL

**Tools/Skills:** MySQL, Git, VS Code, Linux, Windows, RESTful APIs, Oracle DB/MongoDB, Azure DevOps, AI, Agile

## PROJECTS

**Asset Management System** | PHP, MySQL, HTML, CSS, JavaScript | [github.com/TuckerKerr/InventoryManagement](https://github.com/TuckerKerr/InventoryManagement) | <https://www.tuckerkerr.com/inventory/index.html>

- Built a full-stack application with user authentication, CRUD operations, and data validation
- Optimized MySQL database to handle 10+ concurrent users and 1000+ asset records

**IT Student Ticketing System Web Application** | PHP, MySQL, HTML, CSS, JavaScript

- Collaborated on dynamic web application development to streamline IT support workflows
- Implemented announcement chat system and authentication features using agile practices
- Implemented a scheduler for students to create their semester-long schedule and limit the number of workers on at a time between two campuses

## EXPERIENCE

**Assistant Software Engineer Intern** | AIPSO | Johnston, RI - Hybrid | June 2026 – August 2026

- Performed end-to-end testing across development, integration, UAT, and sandbox environments using JSON rating requests, identifying rating discrepancies and validating rate changes to improve software quality and deployment readiness
- Used SQL, JSON APIs, and internal rating platforms to analyze rating data, debug rule-set logic, clean legacy code, and validate commercial and private passenger auto rating systems across multiple states.
- Automated data analysis tasks through database queries, reporting, application cleanup, and actuarial rate reviews, supporting system optimization and business
- Developed and maintained technical documentation for system validation rules, rating logic, and multi-state requirements, improving code clarity, onboarding efficiency, and cross-team alignment.

**IT Field Technician** | Johnson & Wales University | Providence, RI | Sept 2024 - Present

- Developed full-stack web applications for IT Field Service operations, implementing new features to improve efficiency
- Engineered asset management system with database design, RESTful APIs, and responsive UI
- Diagnosed and resolved hardware issues for users across campus

**Residential Assistant** | Johnson & Wales University | Providence, RI | Sept 2024 – Present

- Organized community events for 60+ residents and mediated interpersonal conflicts
- Managed incident reporting and administrative responsibilities
