Tucker Kerr

Easton, MD | tuckerkerrbusi@gmail.com | (540) 490-0269 | LinkedIn | tuckerkerr.com

EDUCATION

Johnson & Wales University Providence, RI
Bachelor of Science in Computer Science Expected May 2027
GPA: 3.9 | Dean's List | Upsilon Pi Epsilon Honor Society | Theta Delta Chi Fraternity
Relevant Coursework: Advanced Data Structures, Operating Systems, Survey of Programming Languages, Information Security with Cryptography, Software Design Project

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, PHP, Java, Kotlin, C, C++, HTML/CSS
Development: Node.js, Git, Android SDK, RESTful APIs, Azure DevOps, Agile, Jest, Docker
Databases & Systems: MySQL, Oracle DB, MongoDB, PostgreSQL, Linux, OpenSSL, Wireshark

EXPERIENCE

Assistant Software Engineer Intern | AIPSO June 2026 - August 2026
Johnston, RI (Hybrid)
- Performed end-to-end testing with JSON rating requests across development, integration, UAT, and sandbox environments; identified rating discrepancies and validated rate changes.
- Used SQL and JSON APIs to analyze rating data, debug rule-set logic, and clean legacy code for commercial and private passenger auto rating systems across multiple states.
- Automated data analysis through database queries and reporting; documented validation rules, rating logic, and multi-state requirements to support system maintenance and team onboarding.

IT Field Technician | Johnson & Wales University September 2024 - Present
- Developed PHP/MySQL applications for IT operations, including asset management and a student ticketing system with authentication, announcements, and semester scheduling across two campuses.
- Implemented scheduling limits on concurrent student workers; diagnose and resolve campus hardware issues.

Residential Assistant | Johnson & Wales University September 2024 - Present
- Organize events for 60+ residents, mediate conflicts, and manage incident reporting and administrative responsibilities.

PROJECTS

NFL Game Prediction Bot | *Python, PostgreSQL, Docker, Redis Streams* | In Progress
- Built a Python data pipeline to collect NFL data through GitHub APIs, clean records, and load them into PostgreSQL
- Integrated Redis Streams to address data processing bottlenecks and use Docker to containerize project services
- Preparing the data foundation for a planned machine learning model to predict NFL game winners

IT Student Ticketing System Web Application | *PHP, MySQL, HTML/CSS, Node.js*
www.tuckerkerr.com/sts/INDEX-HTML/main.html
- Developed PHP/MySQL inventory tools supporting 1,000+ assets and 10+ concurrent users, with authentication and input validation.
- Contributed authentication, announcements, equipment workflows, and scheduling features to a campus IT application serving two campuses
- Enforced student staffing limits through scheduling logic and diagnosed campus hardware issues.

Android Plant Care App | *Kotlin, PHP, MySQL, Android SDK, Volley*
- Built an Android application with a PHP/MySQL backend for account registration, plant search, personal plant collections, and watering tracking.
- Built a client-server API stack using Kotlin and Volley for HTTP/JSON requests, PHP endpoints for backend processing, and MySQL for persistent storage.
- Structured dashboard and collection features with ViewModels, repositories, and LiveData to separate network operations from UI updates.
- Implemented password hashing and prepared SQL statements for registration and login; documented test cases and identified watering, session-management, and UI edge cases.
